Present Address:

Dubai, U.A.E

Personal Information:
Date of Birth: 06/08/1999
Nationality: Indian

Certificates:
Meta Certified Back-End Developer
IBM Certified Back-End Developer
Google Certified Project Management
CertiProf Scrum Certificate

Language Known:
English, Malayalam, Hindi, Tamil

Marital status: Single

Visa Status:
Available Immediately- Yes
UAE Driving License- Yes

CURRICULUM VITAE

SOFTWARE ENGINEER/ANALYST

Career Objective

Results-driven Full Stack Developer/Analyst with ~6 year of experience in designing, developing, and maintaining scalable web applications using Java, Spring Boot, React.js, and modern web technologies. Seeking a challenging role where I can contribute my technical expertise, build high-quality software solutions, and continuously grow while delivering value to the organization.

Experience

Worked as **Senior Software Engineer** with **VOIPBIRD IT Services LLC**, **Dubai U.A.E** 02/12/2023 to 22/04/2026.

Worked as a **Software Engineer** with **TCS** from 01/09/2022 to 30/01/2023.

Worked as a **Full Stack Engineer** with **Infosys** from 01/08/2020 to 30/08/2022.

Worked as a **Software Developer Intern** with **Santhisoft Technologies** from 01/11/2019 to 30/03/2020.

- Backend Development: Java, Spring Boot, Hibernate, RESTful APIs, Microservices.
- Frontend Development: React.js, JavaScript, TypeScript, HTML5, CSS3.
- Database Technologies: MySQL, PostgreSQL, SQL Server, Database Design and Optimization.
- Software Engineering Practices: Agile methodology, CI/CD, Git, Docker, Unit Testing, Cloud Deployment.
- Application Integration: API development, third-party integrations, messaging systems, and enterprise application support.

Educational Details

* **Master of Computer Application (MCA)** in 2023 from IGNOU, New Delhi, India

* **Bachelor Of Computer Application (BCA)** in 2020 from MG University, Kerala, India.

Duties & Responsibilities

Senior Java & Spring Boot Engineer · Voipbird IT Services — Dubai, UAE *Dec 2023 – Apr 2026*

Full ownership of engineering for a growing telecom SaaS company, independently managing 15+ enterprise client deployments and the entire technical infrastructure stack.

- Architected and deployed 5+ mission-critical Spring Boot microservices — including CRM, auto-dialer, DNCR compliance engine, and call recording platforms — serving 15+ enterprise clients with 99.9% measured uptime.
- Engineered a fully automated, rules-based DNCR (Do Not Call Registry) compliance engine using Java multithreading and Kafka event streaming, achieving 100% regulatory compliance across all client accounts.
- Designed and implemented OAuth2/JWT-secured REST APIs with Spring Security, enabling safe data exchange between backend services and external banking systems for regulatory call-recording submissions.
- Applied design patterns across the codebase to improve maintainability, reduce code duplication, and accelerate onboarding of new client configurations.
- Built asynchronous, event-driven data pipelines using Apache Kafka (Spring Kafka) and Redis caching, handling real-time high-volume communication data with low latency.
- Deployed and managed containerized Spring Boot services on AWS EC2— reducing environment-related incidents by eliminating manual server configuration.
- Increased client operational productivity by 25% through a custom CRM built with Spring Boot, Hibernate, and React.js, streamlining customer engagement workflows.
- Restructured auto-dialer communication flows across 5–10 departments, reducing paperwork and manual coordination by 75%.
- Modernized legacy Struts-based modules by progressively migrating to Spring Boot, improving code testability and deployment speed.
- Led QA initiatives — unit testing (JUnit 5, Mockito), regression, and UAT — ensuring zero critical defects at production release across all deployments.

Software Engineer — Java Backend · (TCS) — Full Time *Sep 2022 – Jan 2023*

- Developed and maintained Java backend services within the Mobile Web Service (MWS) team, working on applications built on a microservices architecture.
- Collaborated with cross-functional teams to triage and resolve customer-facing production issues, improving system stability.
- Supported troubleshooting of Microsoft Azure cloud services, gaining exposure to cloud-based Java deployments.
- Analyzed system data at daily, weekly, and monthly cadences to identify inefficiencies and drive storage and performance improvements.

Full Stack Java Engineer · Infosys — Client: HSBC (LoanIQ UK Team) *Aug 2020 – Aug 2022*

Embedded with HSBC's LoanIQ engineering team, delivering full stack Java features for one of the world's largest banking platforms.

- Delivered full stack features in a large-scale banking platform using Spring Boot, Spring Security, Hibernate, and React.js as part of an Agile squad within HSBC's LoanIQ UK team.
- Designed and built a centralized log extraction framework adopted across the entire LoanIQ team, significantly reducing debug turnaround time and accelerating

development cycles.

- Developed a Spring Boot application with OAuth2-secured REST APIs enabling near-instant Control-M job deployment to production, eliminating a previously multi-hour manual process.

Software Developer Intern · Santhisoft Technologies *Nov 2019 – Mar 2020*

- Built an Online Advocate Management System using Java (JSP), PHP, JavaScript, CSS, and MySQL, gaining hands-on foundation in full stack web development and relational database design.

Professional & Personal Skills

- Strong problem-solving skills with the ability to analyze complex technical challenges and deliver effective solutions.
- Excellent communication and collaboration skills with experience working effectively in cross-functional Agile teams.
- Passionate about sharing technical knowledge, mentoring team members, and contributing to continuous improvement.
- Strong sense of ownership and responsibility with a commitment to delivering high-quality software on time.
- Adaptable and flexible in learning new technologies and working in dynamic development environments.
- Excellent analytical skills with attention to detail in coding, debugging, and performance optimization.
- Ability to prioritize tasks, manage deadlines, and make effective technical decisions under pressure.
- Strong understanding of software development best practices, clean code principles, and quality-focused delivery.
- Capable of building positive professional relationships with developers, business teams, clients, and stakeholders.

Declaration

I hereby declare that all the statement made in the Curriculum Vitae are true and correct to the best of my knowledge.
